## TABLE OF CONTENTS

Contents	Page no
<b>CHAPTER 1</b>	
1. INTRODUCTION .....	1
1.1 Background .....	1
1.2 The Executing Agency .....	5
1.3 The Consultant .....	5
1.4 The Project Location .....	5
<b>CHAPTER 2</b>	
2. Methodology .....	7
2.1 Reconnaissance: .....	7
2.2 Data Collection .....	7
2.3 Database Preparation .....	8
2.4 Tabulation .....	8
2.5 Preparation of Thematic Map .....	8
<b>CHAPTER 3</b>	
3. MOBILIZATION AND ORIENTATION .....	9
3.1 Consultant's Organization .....	9
3.2 Mobilization of THE Consultant's Team .....	10
3.3 INITIAL MEETINGS .....	11
<b>CHAPTER 4</b>	
4. FINDINGS: .....	12
4.1 Household Characteristics .....	12
4.1.1 Age and Sex distribution of Respondents .....	12
4.1.2 Sex distribution of Respondents .....	13
4.1.3 Educational Status .....	14

## Final Report on

### *Socio-Economic and Other Surveys under Preparation of Development Plan for Mirsharai Upazila, Chittagong District: Risk Sensitive Landuse Plan*

---

4.1.4 Occupational Status .....	14
4.1.5: Marital Status .....	15
4.1.6: Family Type .....	17
4.1.7: Family Members .....	19
4.1.8: Religion.....	21
4.2: Characteristics of Autism and Disability .....	23
4.2.1 Autism.....	23
4.2.2: Disability.....	25
4.3 Household Income, Expenditure and Savings .....	27
4.3.1: Income of the Household .....	27
4.3.2: Expenditure of Household .....	29
4.3.3: Savings of Household .....	34
4.4: Family Members Staying outside .....	36
4.4.1: Distribution of family members staying outside.....	36
4.4.2: Reasons for Living outside Mirsharai Upazila .....	36
4.5: Structure.....	37
4.5.1: Structure of House .....	37
4.5.2 Number of Floor of Pucca Structure .....	38
4.5.3 Construction Year of House.....	38
4.5.4 Foundation Type of House.....	39
4.5.5 House Soil Type.....	39
4.5.6 Land Price .....	40
4.6 Road .....	42
4.6.1 Road width in-front of House (meter) .....	42
4.6.2 Road Type.....	42
4.6.3 Main Road distance from House (meter).....	44
4.6.4 Condition of Main Road .....	44

## Final Report on

### *Socio-Economic and Other Surveys under Preparation of Development Plan for Mirsharai Upazila, Chittagong District: Risk Sensitive Landuse Plan*

---

4.6.5 Problem of Main Road.....	45
4.6.6 Light post.....	47
4.6.7: Drain.....	47
4.7 Water Sources.....	49
4.7.1 Sources of Water.....	49
4.7.2 Quality of water.....	51
4.8 Source of Fuel.....	53
4.8.1 Sources of Fuel.....	53
4.8.2 Sources of Light.....	53
4.9 Sanitation.....	54
4.9.1 Types of Latrine.....	54
4.9.2 Is latrine hygienic?.....	56
4.10 Diseases.....	58
4.10.1 Attacked by diseases in the last year.....	58
4.10.2 Hospital/Medical facilities distance from house (meter).....	58
4.11 Educational Institution.....	59
4.11.1 Nearest Primary School Distance (m).....	59
4.11.2 Nearest High School Distance (m).....	59
4.12 Recreation.....	60
4.12.1 Location for Recreation.....	60
4.13 Natural Disaster.....	62
4.13.1 Cyclone/Tornado in survey area (Year).....	62
4.13.2 Water Logging in survey area.....	62
4.13.3 Duration of water logging.....	63
4.14.1 First problem in this area.....	63
4.14.2 Land mark/icon/historical place is known to all in Mirsharai Upazila...65	

## Final Report on

### **Executive Summary:**

Different Socio-economic factors like income, expenditure, religious believe, hygienic habit, recreation, occupation pattern, social connection and norms, social status etc. has significant impact on overall development of the area. From this survey, we have found out some socioeconomic factors which are directly related to the socioeconomic status of the survey area.

For this survey work, we tried to incorporate latest online technologies to ensure efficiency in time management and data reliability at the same time. We have used Epicollect 5 Online based data collection software to collect the data from field with geo-coordinate values. After conducting the survey, we extracted the values and done necessary analysis. Results from the analysis are shown in this report afterwards.

In the Mirsharai Upazilla, we have found out the 53.3% of the male respondent and 44.7% of the female respondents. In the report, we find out the 23.3% residents are illiterate and 6% of total residents are highly educated. Though, in Mirsharai Upazilla 76.7 % people are educated, highly educated people are pretty rare. So, education sector of the area still needs improvement.

Because most of the female respondent responses about their occupations as housewife, in the report maximum percentages (39.5%) of occupation is housewife. We found Maximum number of family in the survey area are single family type, which contains 72.2% of the total percentages, and family members at the age range 05-09 contains maximum 53.2% in the count.

Religion distribution in the survey area seems to be predominately Muslim covering almost 85%, Hindu covering 13.8% got the second position and Buddhist has 1.2% in the survey area. We find out 37 autism cases in the survey area, where maximum 33 cases having Autistic Disorder/Classic Autism, and other autism types are Asperger Syndrome and Pervasive Developmental Disorder.

In the survey we found that, 36% of the resident have earned less than TK5, 000 per month in the survey area, and only 2.8% have earned more than TK50000 per month in the survey area. 40.2% of the resident expressed that they are staying outside the country temporarily.

Majority of the expenses belongs to expenditure on food, 52.45% belongs to the expenditure on food, expenditure on house rent presents 1.27% because of the maximum

## **Final Report on**

### *Socio-Economic and Other Surveys under Preparation of Development Plan for Mirsharai Upazila, Chittagong District: Risk Sensitive Landuse Plan*

---

of the residents in the survey area reside their own house. 9.66% of their expenses belongs to the educational purpose, 11.88% to the health and so on.

75.1% respondents in the survey area are with zero savings. Less than TK 1000 saves by the 9% of the respondents. Only 2.7% respondents are manage to save TK 7,000 and more.

Half of structures in the survey area are katcha, 52.8% structure is katcha, and 23.5% belongs to the pucca structure. Road types are divided in five categories, 31.9% of them are Asphalt, similarly 31.6% are BS, Katcha roads belongs to the 29.8%. HBB and RCC are belongs to the less than 10%, as 2.1% and 4.6% respectively. 9% of the respondents said that the condition of the main road is good. Three main problems identified in the survey, 61.2% of the respondents said that the main problem of the main road is narrow road, 12.7% belongs to the occupied by wastages & Hawker.

Majority percent of fuel come from the wood, which belongs to the 82.5%, second fuel source is cylinder gas. Electricity (91.2%) is the main source of light in this area. Solar panel belongs to the 5.5% of the light source in this area. Though, the percentage of solar electricity usage is not so significant, it is a potential alternative source of electricity.

Drinkable water is available here, 88.8% water is drinkable, but 93.0% ground water sources have arsenic contamination. So, surface water can be a good source of drinking water. Khaiyachora and Mohamaya Lake are two most favorite travel destination across the country situated in this area.

Among the all problems recorded in the survey area, load shedding having the maximum percentage (42.9%). Road problem also have the significant percentage (22.5%) in the survey area. Sewerage problem and water logging problems are related, due to interrupted sewerage facilities then definitely there would water logging problem as well.

From education survey we found that student dropout is not in big numbers, but transport and hostel facilities are not impressive in this area. Municipalities are trying to collect and dispose waste properly. Some of the area like hill tracts and lakes have standard noise level (70dB), but others area is not at standard noise level.

We produced a map with 3 (Low, moderate, high) types of potentially based on savings intensity. This map is not based on actual willingness to invest but based on local people's savings pattern from which we can draw a clear understanding about the economic strength

## **Final Report on**

### *Socio-Economic and Other Surveys under Preparation of Development Plan for Mirsharai Upazila, Chittagong District: Risk Sensitive Landuse Plan*

---

and potentiality. In Mirsharai upazila, highly potential areas are concentrated within the proximity of urban areas.

We have prepared a GIS based Spatial Model to calculate people's affordability on spatial perspective. The model output map represents the relative affordability for different land parcels of the project area. The higher the affordability score, the better the affordability of the people living on that particular region. In Mirsharai Upazila, most of the areas are indicated as less affordability oriented.

To map the Need and Demand oriented areas in the project area we formed another model. In Mirsharai Upazila, only a small portion of the areas were found as demand-oriented area.

In this survey, we have collected data in prescribed format and fulfilled the required number of samples. In this report, we've provided some analysis and visual representation using maps and figures to summarize our survey findings.

# CHAPTER 1

## 1. INTRODUCTION

### 1.1 Background

Mirsharai Upazila (CHITTAGONG DISTRICT) area 482.88 sqkm (BBS)/509.80sqkm(GIS Data), located in between 22°39' and 22°59' north latitudes and in between 91°27' and 91°39' east longitudes. It is bounded by TRIPURA state of India, CHHAGALNAIYA and FENI SADAR upazilas on the north, SITAKUNDA upazila and BAY OF BENGAL on the south, FATIKCHHARI upazila on the east, SONAGAZI and COMPANIGANJ (NOAKHALI) upazilas on the west. Mirsharai Thana was formed in 1901 and it was turned into an upazila in 1983. Mirsharai Upazila consists of 2 Municipality, 16 Union and 113 Mouza. Mirsharai, the combination of lake and hilly area contains attractive scenic beauty on the southernmost part of Bangladesh. The most important attraction of the upazila is that one can travel Mohamaya Chara Lake by speed boat and explore hilly area and can enjoy Khoiyachora, Baghbiani, Napitachora, Sonaichora, Mithachora and Boyalia waterfalls.

This area is located 192.2 km far from DHAKA and 4.5 hour bus journey. Anyone can travel by rail and it is 197 km of rail journey and it takes 4.5 hour from Dhaka to Mirsharai Upazila. 56 km from the CHITTAGONG Divisional headquarters and takes 1.5 hour travel by bus. The Bangladesh Road Transport Corporation introduced a direct bus service from Dhaka to Mirsharai via comilla. (Source: Banglapedia, 2012)

## Final Report on

### *Socio-Economic and Other Surveys under Preparation of Development Plan for Mirsharai Upazila, Chittagong District: Risk Sensitive Landuse Plan*

This area is located 192.2 km far from DHAKA and 4.5 hour bus journey. Anyone can travel by rail and it is 197 km of rail journey and it takes 4.5 hour from Dhaka to Mirsharai Upazila. 56 km from the CHITTAGONG Divisional headquarters and takes 1.5 hour travel by bus. The Bangladesh Road Transport Corporation introduced a direct bus service from Dhaka to Mirsharai via comilla. (Source: Banglapedia, 2012)

At Mirsharai Upazila main river is Feni; Sandwip Channel is notable; canal 30, most noted of which are Feni Nadi, Isakhali, Mahamaya, Domkhali, Hinguli, Moliash, Koila Govania and Mayani Khal. The hills range on the northern and eastern side of this upazila along the bank of the Feni River extended up to Chittagong and the Chittagong hill tracts

**Historical Events:** Sultan Fakhruddin Mobarak Shah conquered Chittagong in 1340 AD and established the Muslim rule in this region. During the reign of Gaur Sultans Hussain Shah and Nusrat Shah, Paragal Khan and Chhuti Khan were the rulers of this area. Subsequently Nizam Shah, brother of emperor Sher Shah, was the ruler of this area. Nizampur Pargana is named after Nizam Shah and the whole area of Mirsharai came under the control of Nizampur pargana. From the beginning of the 16th century this region was very rich in Bangla literature. Most of the time between 1580 and 1666 this region was under the control of the Arakanese. The place at which (of the present Mirsharai thana) Bujurg Umed Khan, son of Subadar Sayesta Khan, landed after crossing the Feni River was named as Bujurg Umedpur. With the conquest of Chittagong by Bujurg Umed Khan in 1666, this region came permanently under the Mughal rule. Towards the end of British rule in India, Durgapur and Karerhat areas of Mirsharai upazila were the centres of revolutionary activities of Chittagong. A fierce battle was fought between the freedom fighters (under Capt. Wali Ahmed) and the Pak army at a place adjacent to the Fenafuni Bridge on the south of Mirsharai sadar in which about 100 Pak soldiers were killed. Besides, direct encounters were held between the freedom fighters and the Pak army at many' places including Shuvapur Bridge, Hinguli Bridge, Aochi Mia Bridge and Mostan Nagar.

**Main occupations:** Agriculture 38.93%, non-agricultural laborer 3.61%, industry 0.57%, commerce 13.26%, transport and communication 2.93%, service 18%, construction 1.19%, religious service 0.34%, rent and remittance 8.84% and others 12.33%. Total cultivable land 22,896.40 hectares, fallow land 147713 hectares; single crop 38.91%, double crop 42.46% and treble crop land 18.63%. At present Cultivable land under irrigation is 6,917.85

## Final Report on

### *Socio-Economic and Other Surveys under Preparation of Development Plan for Mirsharai Upazila, Chittagong District: Risk Sensitive Landuse Plan*

hectare. Ownership of agricultural land Landowner 51.30%, landless 48.70%; agricultural landowner: urban 38.82% and rural 52.09%.

**Value of land:** The market value of the first grade arable land is TK. 30000 per 0.01 hectare. Main crops Paddy, potato, aborigine, bean, tomato, pumpkin and radish. Extinct or nearly extinct crops Sugarcane, jute, arahar, mustard, sesame, linseed, and ground nut. Main fruits Mango, blackberry, jackfruit, banana, papaya, litchi, pineapple, water-melon.

**Communication facilities Roads:** Pucca road 230 km, semi-pucca road 119 km, mud road 1435 km; railway 16 km; waterway 11 nautical miles, Rail junction 4. Extinct or nearly extinct traditional transport Palanquin, bullock cart. Noted manufactories Carpet industry, pipe mill, ice factory, rice mill, bakery, brick-field, steel furniture, fish- poultry' feed' factory, bidi factory. There are also Cottage industries, Goldsmith, blacksmith, potteries, weaving, tailoring, bamboo and wood work. Hats, bazars and fairs Hats and bazars are 52, fairs 5, most noted of which are Abu Torab Bazar, Kamar Ali Bazar, Bara Daroga Hat, Mahajan Hat, Karer Hat, Baraia Hat, Shantir Hat, Zorwarganj Baishakhi Mela, Baruni Snan Mela and Shadhinata Mela. Main exports product is Bamboo, fish, paddy, potato, banana, vegetables.

**NGO Activities:** Operationally important NGOs are [BRAC](#), [Proshika](#), [ASA](#), Sheba, CARE, and Hunger Project. Upazila health complex 1, family planning center 16, satellite clinic 11.

**Opportunity:** Bangladesh can earn money in local and also in foreign exchange by opening a tourist resort at Mirsharai. The spot, if properly developed will become an excellent holiday resort and tourist centre. Rowing facility can be arranged easily; fishing and hunting facilities are already there. The success of developing Mirsharai as a tourist centre and Special Economic Zone depends much on good communication facilities and availability of modern amenities. Moreover, the proposed Special Economic Zone would generate many industry related new activities including huge vehicular traffic such as air, rail, road and water. This phenomenon would have both positive and negative impact on the socio-economic condition and existing land use pattern of the region. The proposed planning package would guide such probable changes in the socio-economic condition and land use pattern of the region, and would also address the adverse impact of such changes.

### **1.2 The Executing Agency**

Urban Development Directorate (UDD) was established through a government order in 17th July 1965. This directorate is working under the Ministry of Housing and Public Works. Since its inception, UDD is contributing in developing Master Plan/Land Use Plan for small, medium and large town and cities of Bangladesh. Thus it is contributing in development of the localities and lifestyle of peoples of Bangladesh in direct and indirect ways.

Vision of UDD is to augment the quality of life of the people by improving the environment through planned development activities for adequate infrastructure, services and utility provision, to make optimum utilization of resources especially land and to ensure a geographically balance urbanization. It also aims to reduce local and regional disparity by alleviating poverty and to create good governance in the country through people participation and empowering of woman. Urban Development Directorate would welcome any co-operation, assistance and patronage from national and international quarters.

### **1.3 The Consultant**

**GEOMARK LIMITED -TILLER** a Joint venture Organisation having expertise on socioeconomic survey through smart device, data processing, data analysis and report writing.

### **1.4 The Project Location**

The proposed project would be prepared on a regional development perspective considering the region as a part of whole of Mirsharai Upazila and its 16 unions. In this development

## Final Report on

### *Socio-Economic and Other Surveys under Preparation of Development Plan for Mirsharai Upazila, Chittagong District: Risk Sensitive Landuse Plan*

planning package since its location is strategically important from the regional context because this upazila is situated on the way to Dhaka Chittagong highway as the highway runs through this upazila.

**Table: Area, Population and Density of the Project Area:**

Municipality	Union	Mouza	Village	Population		Density (per sq km)	Literacy Rate (%)
				Urban	Rural		
2	16	103	208	31206	367510	826	55.1

Source: BBS, 2011

Mirsharai sea beach, hilly area, Mohamaya Chara Lake, Khaiya Chara region has the greater potential for tourism development as there are abundant resources to attract tourists. Mirsharai is developing in an unplanned and haphazard manner very rapidly due to the ample opportunity for tourism development, which is acting as pull factor for private sector developers. Hence, this project has been under taken to protect the region from depletion of its natural resources and character and tourism development as well.

Moreover, honourable MoHPW Minister expressed his heartiest interest to develop char of this Upazila as an exclusive economic zone; as well as to establish a tourist zone and economic zone covering Mirsharai upazila.

## **CHAPTER 2**

### **2. Methodology**

**2.1 Reconnaissance:** The reconnaissance survey is an extensive study of an entire area that might be used for a road or airfield. Its purpose is to eliminate those routes or sites which are impractical or unfeasible and to identify the more promising routes or sites. Existing maps and aerial photographs may be of great help.

**2.2 Data Collection:** Data collection is the process of gathering and measuring information on variables of interest, in an established systematic fashion that enables one to answer stated research questions, test hypotheses, and evaluate outcomes.

We have collected data from Field Survey 2018 with open-ended, close-ended questionnaire and also focus group discussion.

#### **Sample Size:-**

AS a descriptive study we had to needed the data as a main aim the estimation of rates, proportions and means in a population with a secondary aim being to examine whether the rates are related to demographic variables. The main results to be reported might be the percentage of different type of socioeconomic variables.

Sample size determination for descriptive studies is based on confidence intervals; that is, the level of precision required in providing estimates of the rates, proportions and means. Here we collect 1350 sample for this survey.

**Population Size** —Population size would be the total number of households in the Mirsharai. Not all populations' sizes need to be large. Even if population size is small, it's not being worried about the population size. The Population of our survey area is more than three hundred thousand.

**Margin of Error (Confidence Interval)** — No sample will be perfect, so we have decided how much error to allow. The confidence interval determines how much higher or lower than the population mean we are willing to let our sample mean fall. We have carried out of the survey with a margin of error of +/- 5%.

**Confidence Level** — How confident about the actual mean falls within your confidence interval? The most common confidence intervals are 90% confident, 95% confident, and 99% confident. We have been selected the 95% confidence interval.

**2.3 Database Preparation:** We researchers spend a lot of time interviewing our clients to determine their needs. Then we go about carefully creating a plan to collect the data that will be most useful. Having done that, the appropriate instrument is carefully crafted that will generate data that can ultimately be transformed into knowledge. All this up-front work necessitates and lot of time and effort. And well it should! But sooner or later we will have collected data and need to start the grunt work of data preparation.

So what is involved in data preparation? There are several simple, but sometimes overlooked steps, required to properly prepare data. They are:

- **Questionnaire checking:** Questionnaire checking involves eliminating unacceptable questionnaires. These questionnaires may be incomplete, instructions not followed, little variance, missing pages, past cutoff date or respondent not qualified.
- **Editing:** Editing looks to correct illegible, incomplete, inconsistent and ambiguous answers.
- **Coding:** Coding typically assigns alpha or numeric codes to answers that do not already have them so that statistical techniques can be applied.
- **Cleaning:** Cleaning reviews data for consistencies. Inconsistencies may arise from faulty logic, out of range or extreme values.
- **Statistical adjustments:** Statistical adjustments applies to data that requires weighting and scale transformations.
- **Analysis strategy selection:** Finally, selection of a data analysis strategy is based on earlier work in designing the research project but is finalized after consideration of the characteristics of the data that has been gathered.

**2.4 Tabulation:** - Making a table for rearrange the data we have, using excel to clean the data for making the usable for the SPSS import. Tables like cross section data, different type of categorical variables are represented in the table.

**2.5 Preparation of Thematic Map:** - Best representation of socioeconomic data is presentation of thematic map about the different type of socioeconomic variables, Using GIS software and actual coordinate system the thematic map shows the authentic information about the socioeconomic condition of the Mirsharai.

# CHAPTER 3

## **3. MOBILIZATION AND ORIENTATION**

### **3.1 Consultant's Organization**

**Geomark Ltd.** is brand with specific focus to the emerging IT Enabled Services (ITES) specializing in the geospatial applications including consultancy on engineering & Architectural Design, Drawing, Supervision, planning GIS, LIS, MIS, AM/FM, processing of remote sensing data, digital mapping/surveying using GPS, geo-spatial and textual data conversion, application software and web page/solutions development and so forth. Apart from ITES, provides professional consulting services particularly for undertaking research and development studies/projects covering and not limited to land, natural resources, environment, urban/real estate development, infrastructure development, institution and organization studies, land related legislation study, human resources development studies, general education related studies, and so forth.

**Tiller** was founded in 2009 and grown up with focus on Urban & Regional context, developing the avenues in Urban Designing & Planning, Infrastructure Design, Disaster Management, Social Research, GIS Mapping and IT services. **Tiller** is led by a robust, talented & experienced group of Urban Planner, Engineer, Architect, Social Scientist, Environmental scientist and IT professionals.

The agreement between Urban Development Directorate (UDD) and consultant Geomark Ltd.-Tiller has been held on 14<sup>th</sup> November, 2017 for Package-3: socioeconomic and others survey under the project Preparation of Development Plan for Mirsharai Upazila, Chittagong District: Risk Sensitive Landuse Plan. Some picture of the contract signing ceremony have been given in the next page.

**Picture:** Project contract signing ceremony between Urban Development Directorate (UDD) and Geomark Ltd.-Tiller joint venture on 14<sup>th</sup> November, 2017.

### **3.2 Mobilization of THE Consultant’s Team**

The contract signed on 14<sup>th</sup> November 2017, the Joint Venture (JV) team of the Geomark-Tiller has initiated their project activities with immediate action. A progress line-up from the consulting JV team is being reported here on different components of work:

Mr. ANM Safiqul Alam Managing Director, GEOMARK , Md Tamzidul Islam Proprietor, Tiller meet with PMO about some issue like questionnaire design, software platform design etc.

*Photograph 1: Meeting with Project Director (PD)*

### **3.3 INITIAL MEETINGS**

1. **Work Schedule:** preparation and adjustment work is undergoing with Microsoft Project. The submission has scheduled to be made within 18<sup>th</sup> onward.
2. **Questionnaire preparation:** A questionnaire have been prepared in according to consolidate with Project director (PD) and planners of UDD. The questionnaire have attached in the annex of this report.
3. **Online data collection software preparation:** For socioeconomic data collection an online free software have been used named Epicollect 5. The questionnaire already developed on Epicollect 5 software platform which have been presented in the meeting of UDD in front of all the officials of UDD including Director.  
Picture: Demo picture of online data collection in the meeting.
4. **Inception Report Preparation:** For inception report preparation it has scheduled to submit within 18th onward.
5. **Survey Activities:** Team formation is in progress. As soon as the inception report will be approved, the team will be mobilized to the field.

## CHAPTER 4

### 4. FINDINGS:

#### 4.1 Household Characteristics:

##### 4.1.1 Age and Sex distribution of Respondents:

In table-4.1., the age distribution of the survey area in Mirsharai is presented. It Shows that no respondents of female below 10 years. Age distribution 50-59 belongs to the highest percent of responses having 23.3%, which is quite similar (22.2%) to the preceding category 40-49 age distribution.

*Table 1: Age distribution of Respondents*

Age of the Respondents				
Categories	Frequency	Percent	Valid Percent	Cumulative Percent
10-19	39	3.0	3.0	3.0
20-29	134	10.3	10.3	13.3
30-39	203	15.6	15.6	28.9
40-49	289	22.2	22.2	51.2
50-59	303	23.3	23.3	74.5
60-69	227	17.5	17.5	91.9
70-79	80	6.2	6.2	98.1
80+	25	1.9	1.9	100.0
<b>Total</b>	1300	100.0	100.0	

Source: Field Survey 2018

Figure 4.1.1 represents the different bars having different percentages. Age category 50-59 having the highest percentage (23.3%) in figure and age category above 80 years presenting the lowest percentage (1.9%) in the bar diagram

*Figure 1: Age distribution of the Respondents*

**4.1.2 Sex distribution of Respondents:** 55.3% male respondent responses against the 44.7% female respondents in the survey

*Table 2: Sex distribution of Respondents*

Categories	Frequency	Percent	Valid Percent	Cumulative Percent
Male	719	55.3	55.3	55.3
Female	581	44.7	44.7	100.0
<b>Total</b>	1300	100.0	100.0	

Source: Field Survey 2018

## Final Report on

*Socio-Economic and Other Surveys under Preparation of Development Plan for Mirsharai Upazila, Chittagong District: Risk Sensitive Landuse Plan*

**4.1.3 Educational Status:** Total eight categories in education status where illiterate considered the lowest status as usual. Total 23.3% resident in the survey area is illiterate. Maximum 33.1% of residents are observed primary education category. Higher study category as Degree/Honours/ Fazil belongs 4.7% and Masters or Higher (PhD. Doctors, lawyer, Engineer et cetera) only 1.3% in this study.

*Table 3: Education Status of the respondents*

### Educational Level

Categories	Frequency	Percent	Valid Percent	Cumulative Percent
Illiterate	303	23.3	23.3	23.3
Primary	430	33.1	33.1	56.4
Junior Secondary	133	10.2	10.2	66.6
SSC/Dhakil	268	20.6	20.6	87.2
HSC/Alim	79	6.1	6.1	93.3
Degree/Honours/ Fazil	61	4.7	4.7	98.0
Masters or Higher	17	1.3	1.3	99.3
Technical	9	.7	.7	100.0
Total	1300	100.0	100.0	

Source: Field Survey 2018

**4.1.4 Occupational Status:** Majority of the female in survey area work at their home, so the study shows the highest percentage to occupational status Housewife, belonging 39.5%. Second highest percentage 16.55% belongs to the category Self-Independent. Self-Independent refers who are not disclose their occupational status. 12.2% of the resident work in the agricultural sector in the survey area. Lowest percentage belongs to the Transport worker only 1.4% in the survey.

## Final Report on

*Socio-Economic and Other Surveys under Preparation of Development Plan for Mirsharai Upazila, Chittagong District: Risk Sensitive Landuse Plan*

*Table 4: Occupational Status of the Respondents*

### Level of Occupation

Categories	Frequency	Percent	Valid Percent	Cumulative Percent
Agriculture	158	12.2	12.2	12.2
Business(Small/Medium)	92	7.1	7.1	19.2
Construction Work	36	2.8	2.8	22.0
Day Labour	96	7.4	7.4	29.4
Government Job	36	2.8	2.8	32.2
Housewife	513	39.5	39.5	71.6
Skilled labour	24	1.8	1.8	73.5
Private Job	43	3.3	3.3	76.8
Self-independent	215	16.5	16.5	93.3
Shopkeeper	18	1.4	1.4	94.7
Student	51	3.9	3.9	98.6
Transport Work	18	1.4	1.4	100.0
<b>Total</b>	<b>1300</b>	<b>100.0</b>	<b>100.0</b>

## **4.2: Characteristics of Autism and Disability**

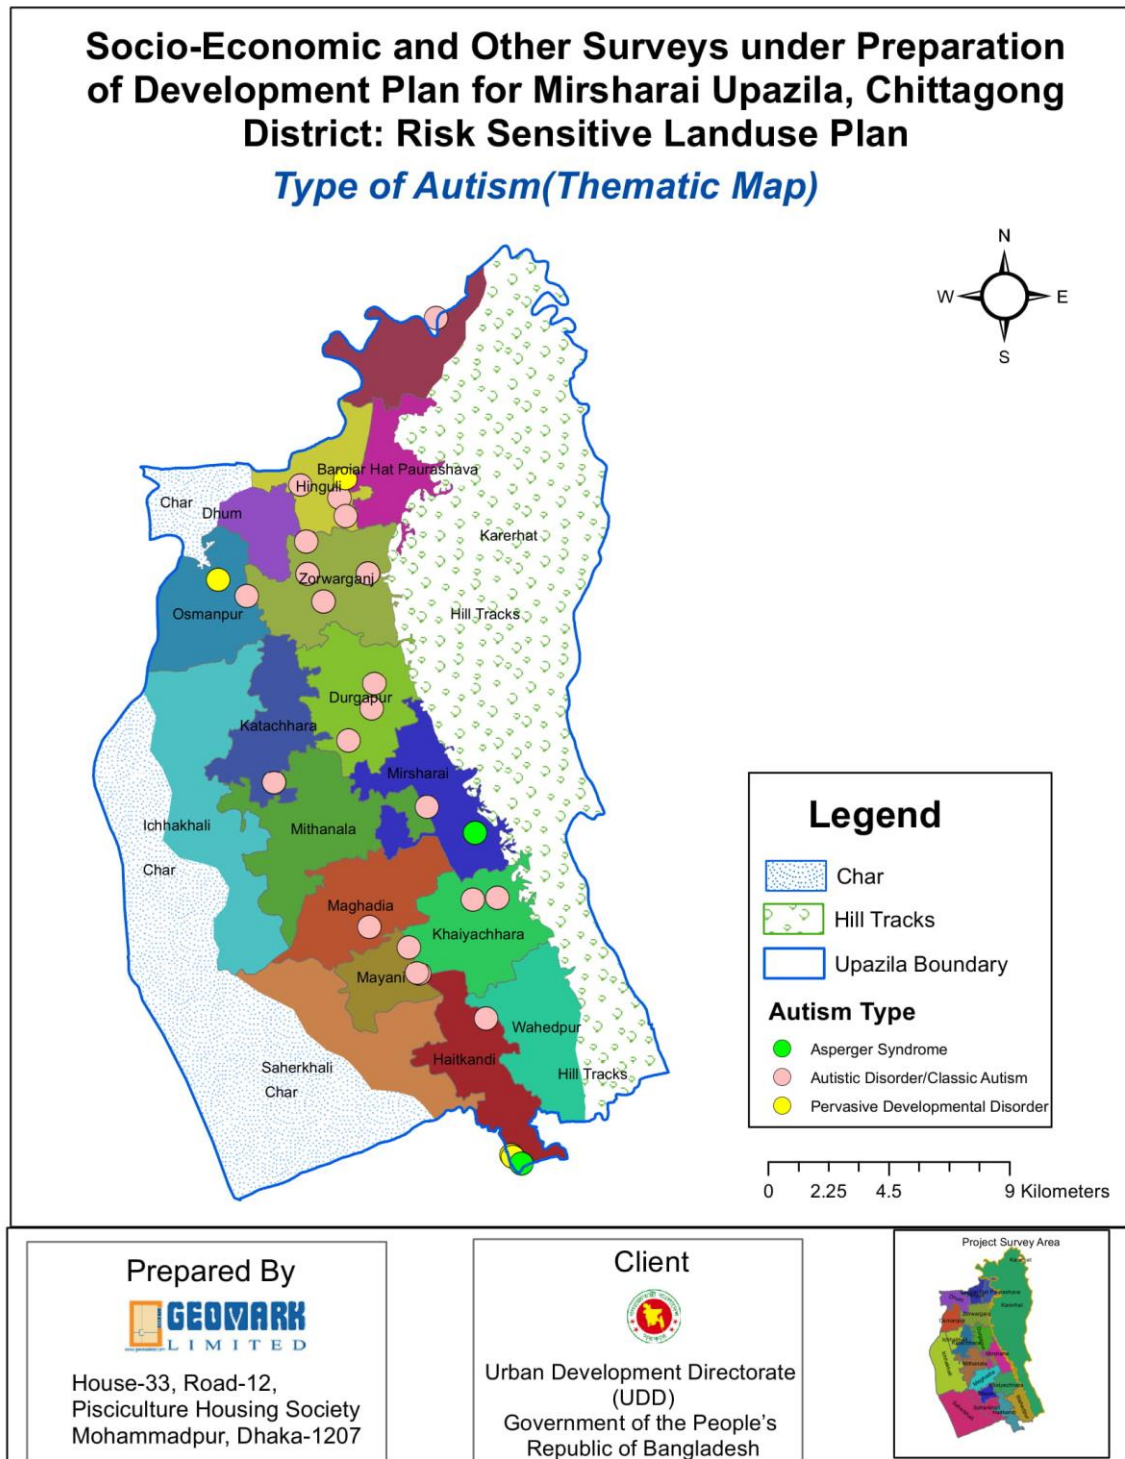

**4.2.1 Autism:** Asperger Syndrome, Autistic Disorder/Classic Autism and Pervasive Developmental Disorder these three kinds of autistic case found in the survey area. Total 37 cases were found in the survey area. Among the total of the cases 33 cases were Autistic Disorder/Classic Autism, which represent the 89.2% of the total autism in the Table 4.2.1.

*Table 8: Distribution of Autism*

### **Types of Autism**

<b>Categories</b>	<b>Frequency</b>	<b>Percent</b>	<b>Valid Percent</b>	<b>Cumulative Percent</b>
<b>Asperger Syndrome</b>	1	.1	2.7	2.7
<b>Autistic Disorder/Classic Autism</b>	33	2.4	89.2	91.9
<b>Pervasive Developmental Disorder</b>	3	.2	8.1	100.0
<b>Total</b>	37	2.7	100.0	

Source: Field Survey 2018

*Map 7: Type of Autism*

### 4.3 Household Income, Expenditure and Savings

**4.3.1: Income of the Household:** In the Table 4.3.1, showing the maximum income category is (TK10,000-TK14,000) belongs to the 22.1%.

*Table 10: Percentage distribution of Household income*

**Household Monthly Income (TK)**

Categories	Frequency	Percent	Valid Percent	Cumulative Percent
<5,000	49	3.6	3.6	3.6
05,000- 09,000	261	19.3	19.3	23.0
10,000-14,000	298	22.1	22.1	45.0
15,000-19,000	228	16.9	16.9	61.9
20,000-24,000	188	13.9	13.9	75.9
25,000-29,000	112	8.3	8.3	84.1
30,000-34,000	70	5.2	5.2	89.3
35,000-39,000	50	3.7	3.7	93.0
40,000-44,000	28	2.1	2.1	95.1
45,000-49,000	28	2.1	2.1	97.2
50,000 +	38	2.8	2.8	100.0
<b>Total</b>	1350	100.0	100.0	

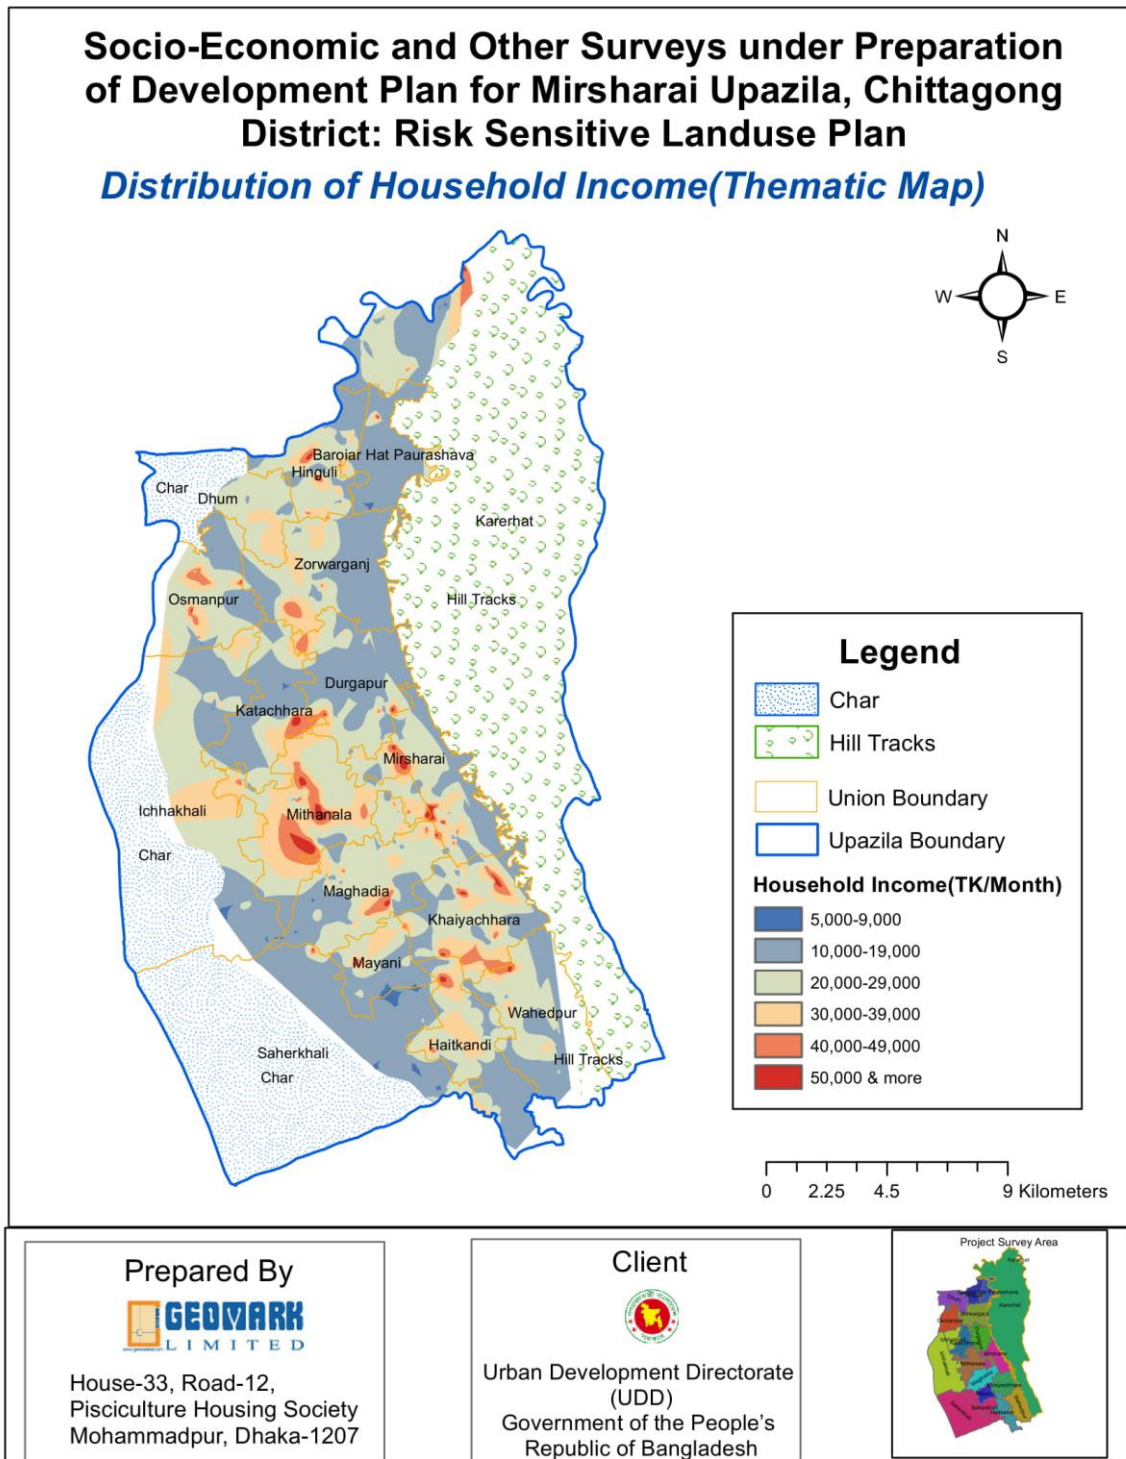

Source: Field Survey 2018

TK50,000 and more income belongs to the only 2.8% of the resident in the survey area. Monthly income below TK5,000 belongs to the 3.6% of the residents.

*Figure 2: Bar diagram of Household monthly Income*

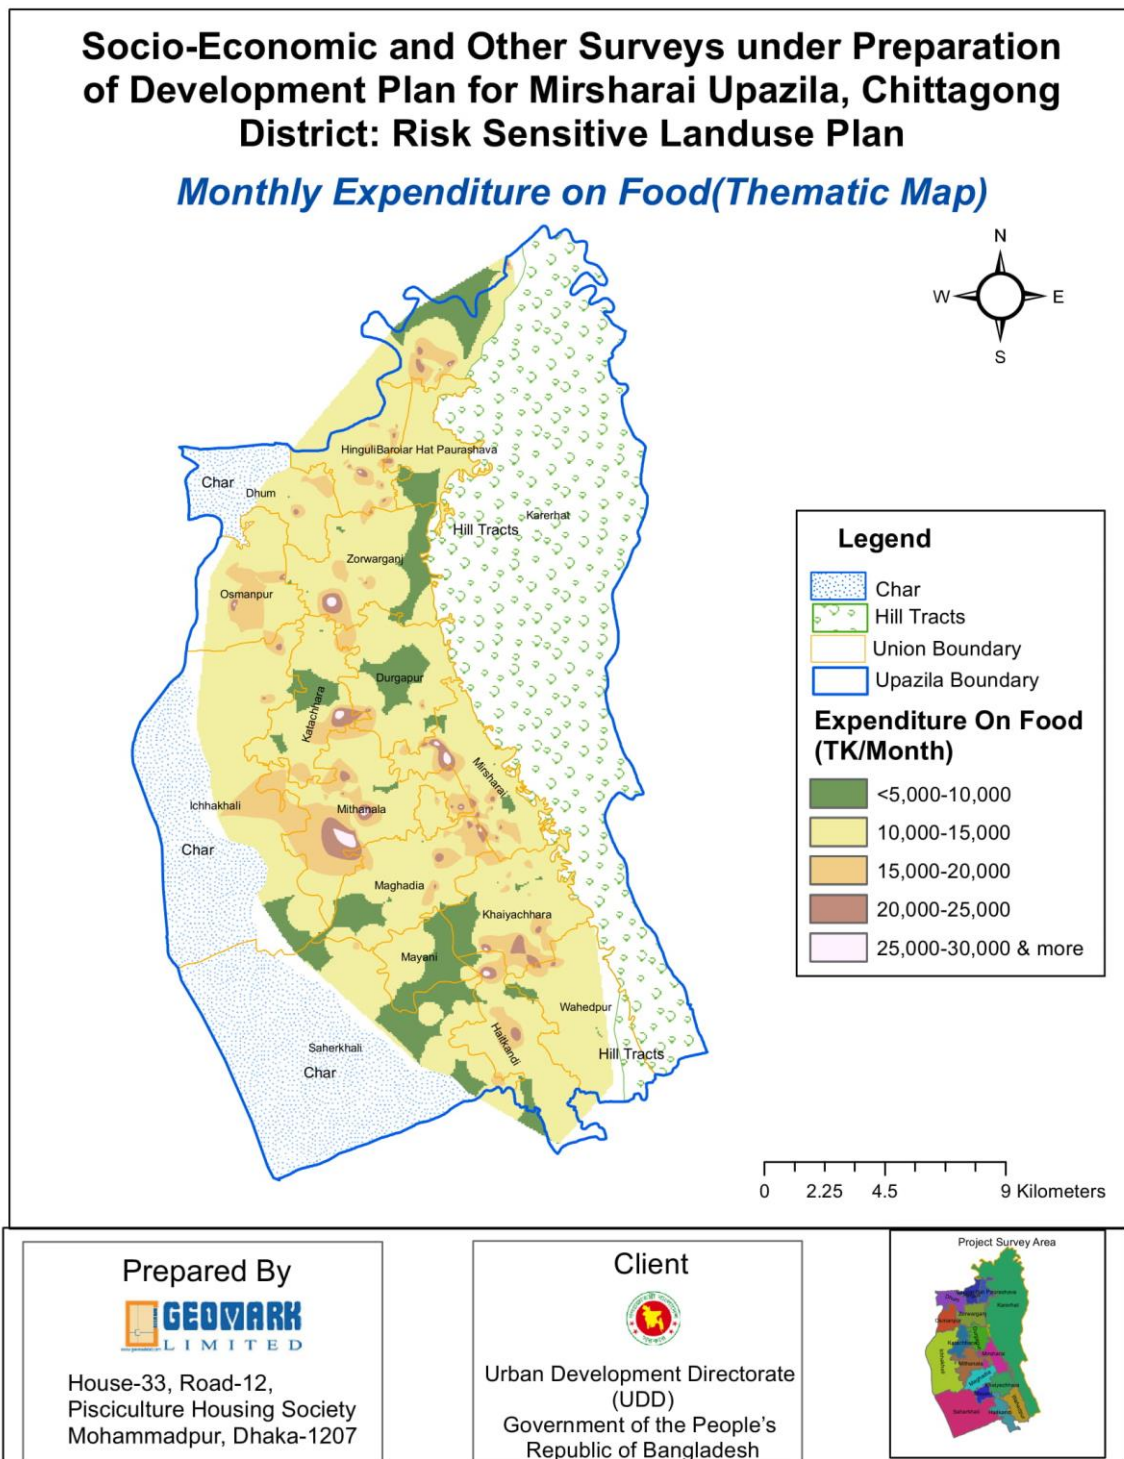

*Map 9: Percentage distribution of Household income*

**Source: GeoMark GIS Lab**

**4.3.2: Expenditure of Household:** Majority of the expenses belongs to expenditure on food, In the Figure 4.3.2, showing the 52.45% belongs to the expenditure on food, expenditure on house rent presents 1.27% because of the maximum of the residents in the survey area reside their own house. 9.66% of their expenses belongs to the educational purpose, 11.88% to the health and so on. Fig. 04 is showing a relative comparison among expenditures in different sectors. Maps for all sectors are shown below,

*Figure 3: Bar Diagram of Household Expenditures*

**Source: GeoMark GIS Lab**

*Map 12: Monthly expenditure on Utility*

**Source: GeoMark GIS Lab**

*Map 13: Total household expenditure*

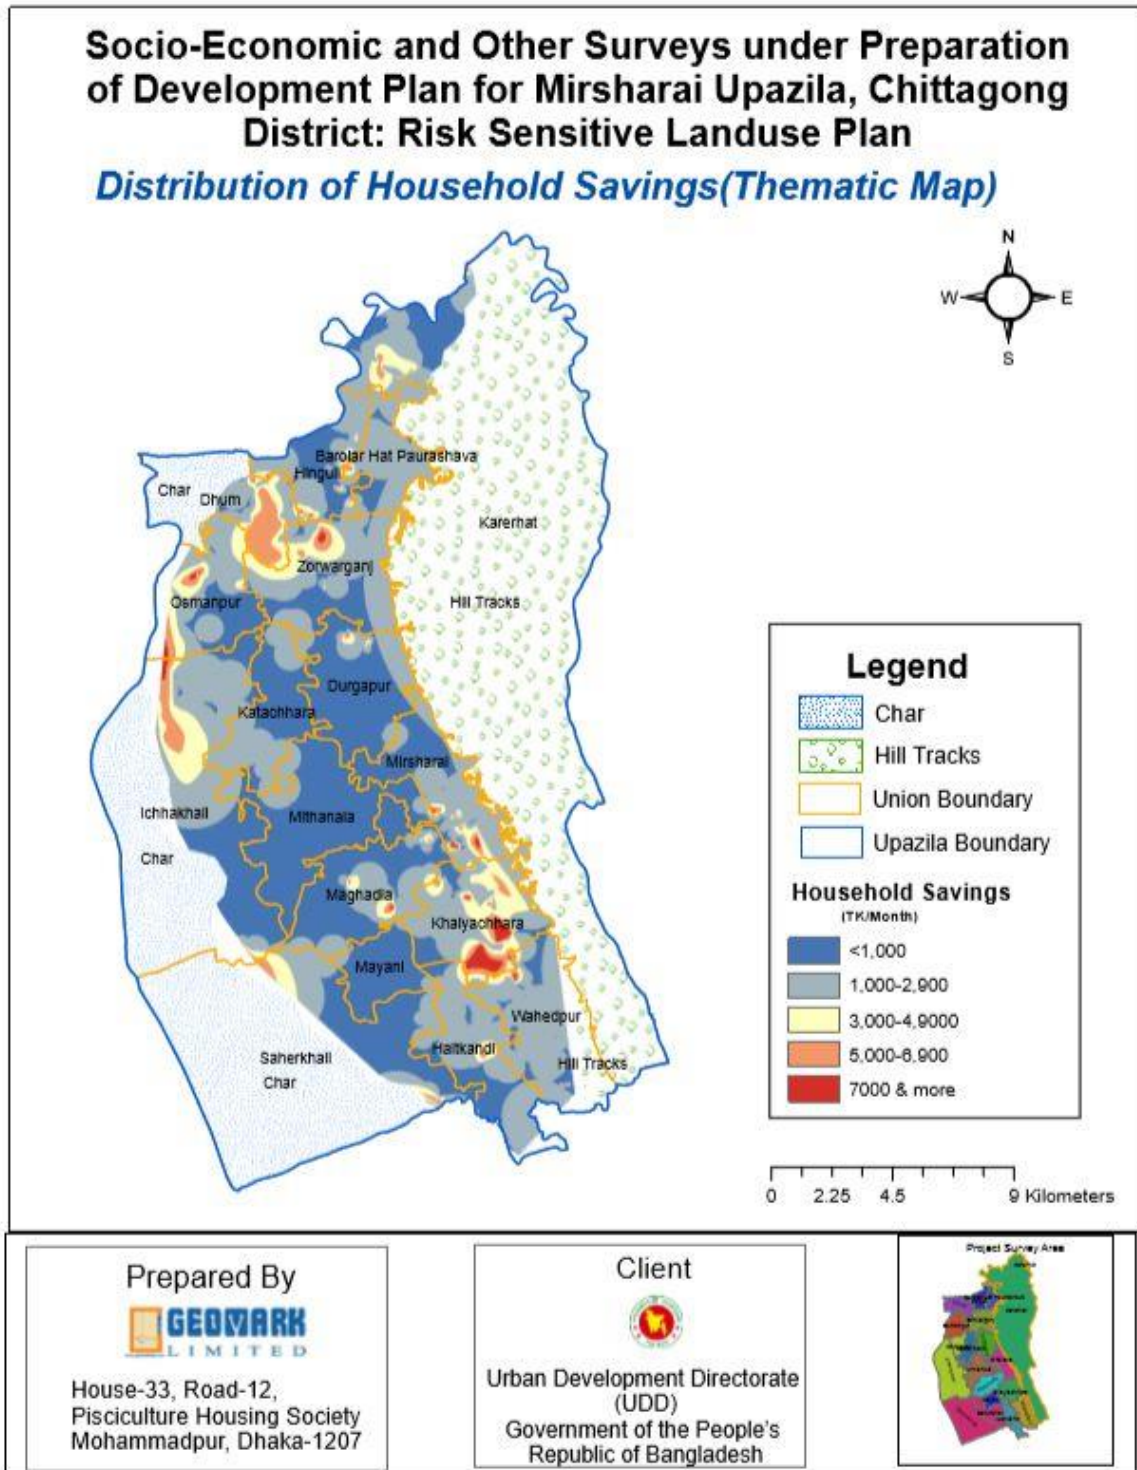

**Source: GeoMark GIS Lab**

**4.3.3: Savings of Household:** In the Table 4.3.3 showing the 75.1% respondents in the survey area are with zero savings. Less than TK1,000 saves by the 9% of the respondents. Only 2.7% respondents are manage to save TK 7,000 and more.

*Table 11: Distribution of Household Savings*

**Monthly Savings**

<b>Categories</b>	<b>Frequency</b>	<b>Percent</b>	<b>Valid Percent</b>	<b>Cumulative Percent</b>
<b>0</b>	1014	75.1	75.1	75.1
<b>&lt;1000</b>	122	9.0	9.0	84.1
<b>1,000-1,900</b>	69	5.1	5.1	89.3
<b>2,000-2,900</b>	39	2.9	2.9	92.1
<b>3,000-3,900</b>	10	.7	.7	92.9
<b>5,000-5,900</b>	53	3.9	3.9	96.8
<b>6,000-6,900</b>	6	.4	.4	97.3
<b>7,000+</b>	37	2.7	2.7	100.0
<b>Total</b>	1350	100.0	100.0	

*Map 14: Distribution of household saving*

**Source: GeoMark GIS Lab**

**4.4: Family Members Staying outside**

**4.4.1: Distribution of family members staying outside:** Staying outside of the home could be in two categories-Permanent & Temporary. Among the resident of total number of people staying outside the Mirsharai, 44.2 % belongs to the people who are staying outside country temporarily. Only 4.8% are staying outside of the country permanently.

In the Table 4.4.1, showing the 40.2% belongs to the category people who are staying other parts of the country temporarily.

*Table 12: Distribution of family members staying outside*

**Staying Outside of Mirsharai Upazila**

Categories	Frequency	Percent	Valid Percent	Cumulative Percent
Country(Permanent)	43	10.8	10.8	10.8
Country(Temporary)	160	40.2	40.2	51.0
Outside Country (Permanent)	19	4.8	4.8	55.8
Outside Country (Temporary)	176	44.2	44.2	100.0
<b>Total</b>	398	100.0	100.0	

Source: Field Survey 2018

**4.4.2: Reasons for Living outside Mirsharai Upazila:** It could be different reasons for staying outside, In the Table 4.4.2, Job/Workplace category one of the main reason to staying outside of the home, which belongs to the 68.8%.Business responsible for only 5.8% for staying outside. For higher education one of the reason to staying people staying outside the home, because higher educational institutions are not available here, so that 14.6% are staying outside of the Mirsharai.

*Table 13: Distribution of reasons for living outside*

<b>Reasons for Living Outside Mirsharai Upazila</b>				
<b>Categories</b>	<b>Frequency</b>	<b>Percent</b>	<b>Valid Percent</b>	<b>Cumulative Percent</b>
<b>Business</b>	23	5.8	5.8	5.8
<b>Environmental Reasons</b>	43	10.8	10.8	16.6
<b>Job/Workplace</b>	274	68.8	68.8	85.4
<b>Higher Education</b>	58	14.6	14.6	100.0
<b>Total</b>	398	100.0	100.0	

Source: Field Survey 2018

## **4.5: Structure**

**4.5.1: Structure of House:** Half of structures in the survey area are katcha, 52.8% structure is katcha, and 23.5% belongs to the pucca structure,

*Table 14: Distribution of House Structure*

### **Structure of House**

<b>Categories</b>	<b>Frequency</b>	<b>Percent</b>	<b>Valid Percent</b>	<b>Cumulative Percent</b>
<b>Jhupri</b>	112	8.8	8.8	8.8
<b>Katcha</b>	671	52.8	52.8	61.6
<b>Semi Pucca</b>	189	14.9	14.9	76.5
<b>Pucca</b>	299	23.5	23.5	100.0
<b>Total</b>	1271	100.0	100.0	

Source: Field Survey 2018

**4.5.2 Number of Floor of Pucca Structure:** Majority of the pucca structures are having one storied building, 85.5% structures belongs to the one-storied. 9.9% structures are two storied, only 1.5% having the four storied.

*Table 15: Distribution of Number of Floor (Pucca Structure)*

**Number of Floor (Pucca Structure)**

Number of Floors	Frequency	Percent	Valid Percent	Cumulative Percent
1	224	85.5	85.5	85.5
2	26	9.9	9.9	95.4
3	7	2.7	2.7	98.1
4	4	1.5	1.5	99.6
5	1	.4	.4	100.0
<b>Total</b>	262	100.0	100.0	

Source: Field Survey 2018

**4.5.3 Construction Year of House:** In the Table 4.5.3, showing the 63.5% of the home structure constructed in the 1980 to 2010. Old structure which are constructed in the year 1890 to 1920, belongs to .6%.

*Table 16: Distribution of Construction year of House*

<b>Construction Year of House</b>				
Year	Frequency	Percent	Valid Percent	Cumulative Percent
1890-1920	7	.6	.6	.6
1920-1950	18	1.6	1.6	2.2
1950-1980	76	6.7	6.7	8.9
1980-2010	723	63.5	63.5	72.4
2010-2018(current year)	314	27.6	27.6	100.0
Total	1138	100.0	100.0	

Source: Field Survey 2018

**4.5.4 Foundation Type of House:** Majority of the foundations are RCC foundation in the survey area. RCC foundation belongs to the 49%, Brick foundation belongs to the 34.5% and rest of the foundations are count as an others belongs to the 16.6%

*Table 17: Distribution of Foundation Type*

<b>Foundation Type of House</b>				
<b>Categories</b>	<b>Frequency</b>	<b>Percent</b>	<b>Valid Percent</b>	<b>Cumulative Percent</b>
<b>Brick</b>	233	34.5	34.5	34.5
<b>RCC</b>	331	49.0	49.0	83.4
<b>Others</b>	112	16.6	16.6	100.0
<b>Total</b>	676	100.0	100.0	

Source: Field Survey 2018

**4.5.5 House Soil Type:** In the Table 4.5.5, showing the 79% of the house soil type is Muddy land, minimum 1.9% belongs to the Red Soil in the survey area. Sand soil belongs to the 17.2% as house soil type.

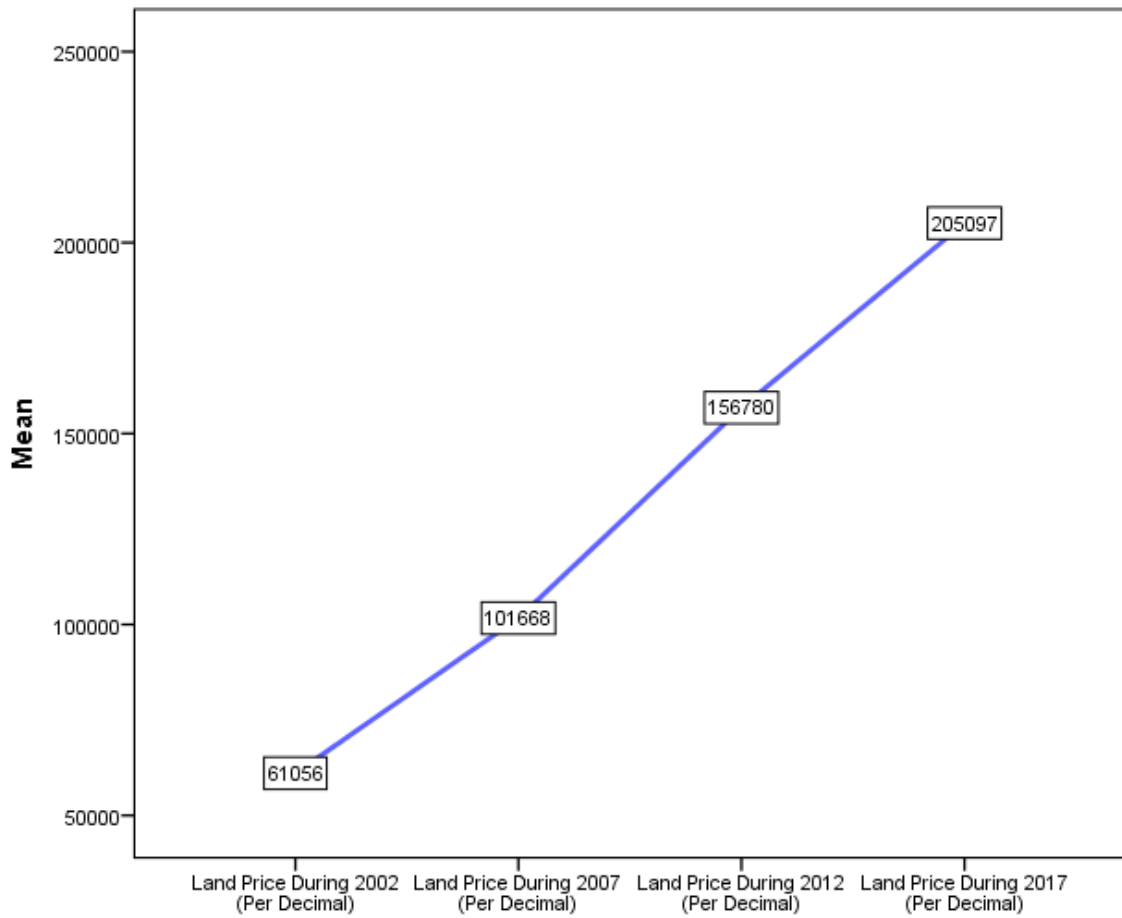

*Table 18: Distribution of house soil type*

**House Soil Type**

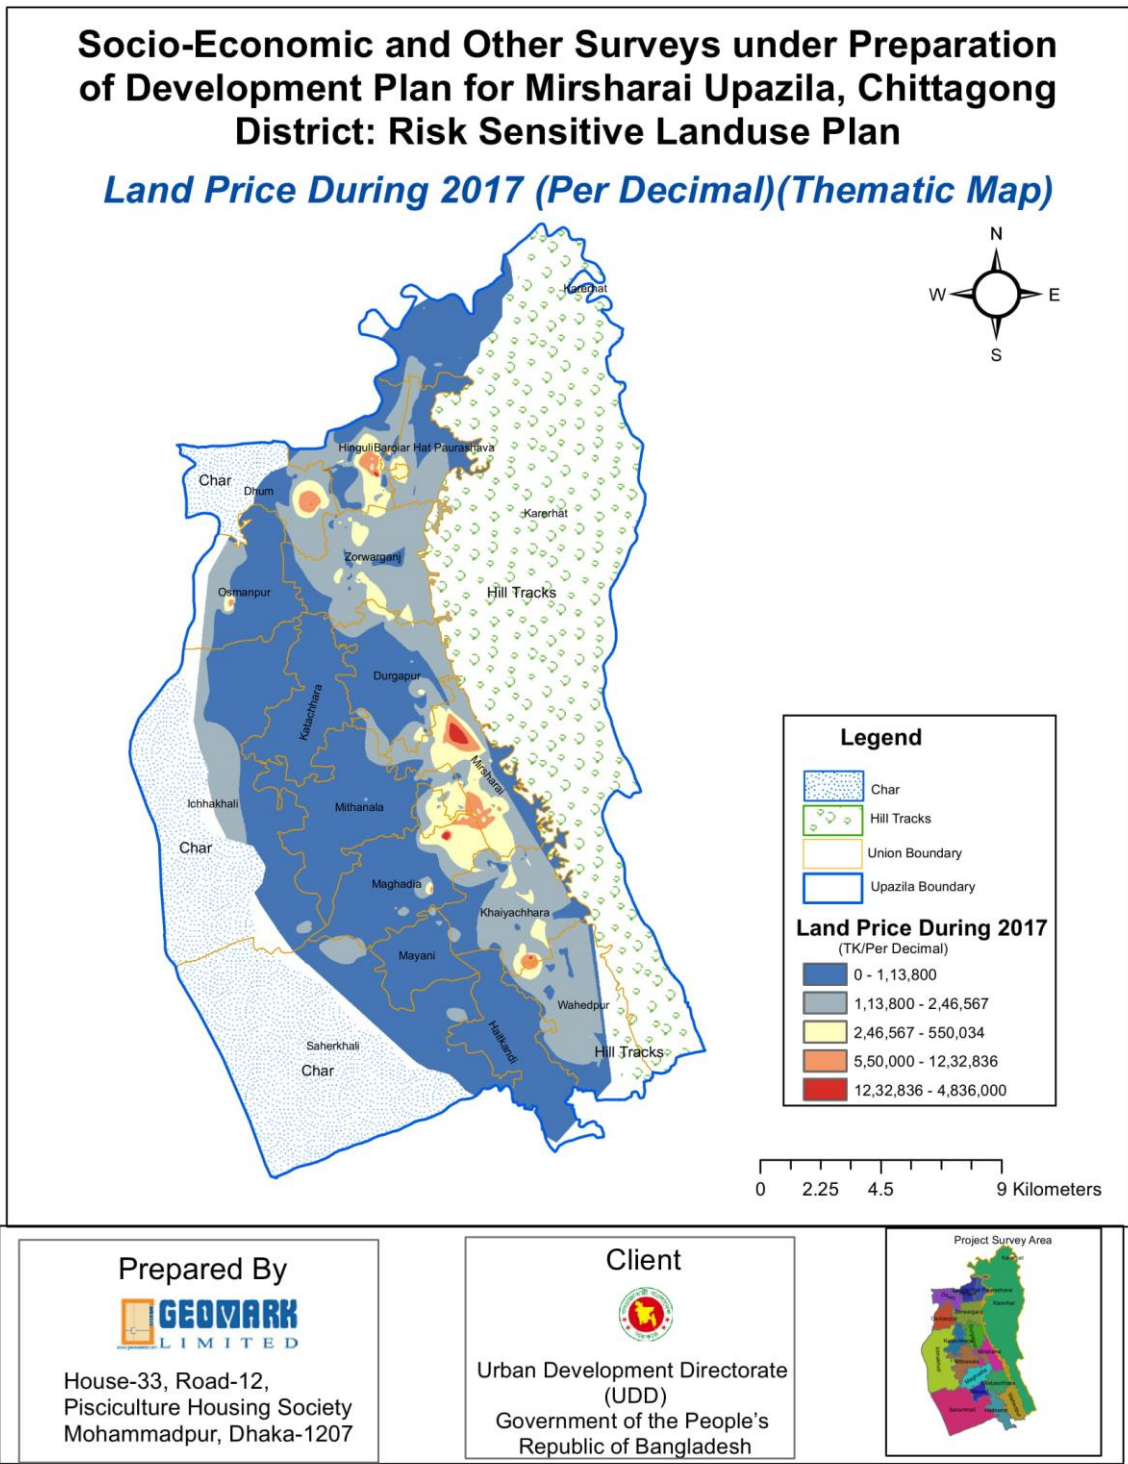

<b>Categories</b>	<b>Frequency</b>	<b>Percent</b>	<b>Valid Percent</b>	<b>Cumulative Percent</b>
<b>Muddy Land</b>	1066	79.0	79.0	79.0
<b>Red Soil</b>	25	1.9	1.9	80.8
<b>Rock Soil</b>	27	2.0	2.0	82.8
<b>Sand Soil</b>	232	17.2	17.2	100.0
<b>Total</b>	1350	100.0	100.0

In the figure 4.14.1, showing the water logging problem is one of the main problem in the survey area, which belongs to 10%, and 2.1% belongs to the sewerage problem.

Figure 5: Bar Diagram of First problem of the Area

**4.14.2 Land mark/icon/historical place is known to all in Mirsharai Upazila:** In the

Figure 4.14.2, respondents are consider their choice how to describe their area in one word, in this way 32.32% residents chooses the Mohamaya Lake which is better describe the Mirsharai upazila they think. Khoichora waterfall is one of the important natural beauty in Mirshari which belongs to 15.05%.

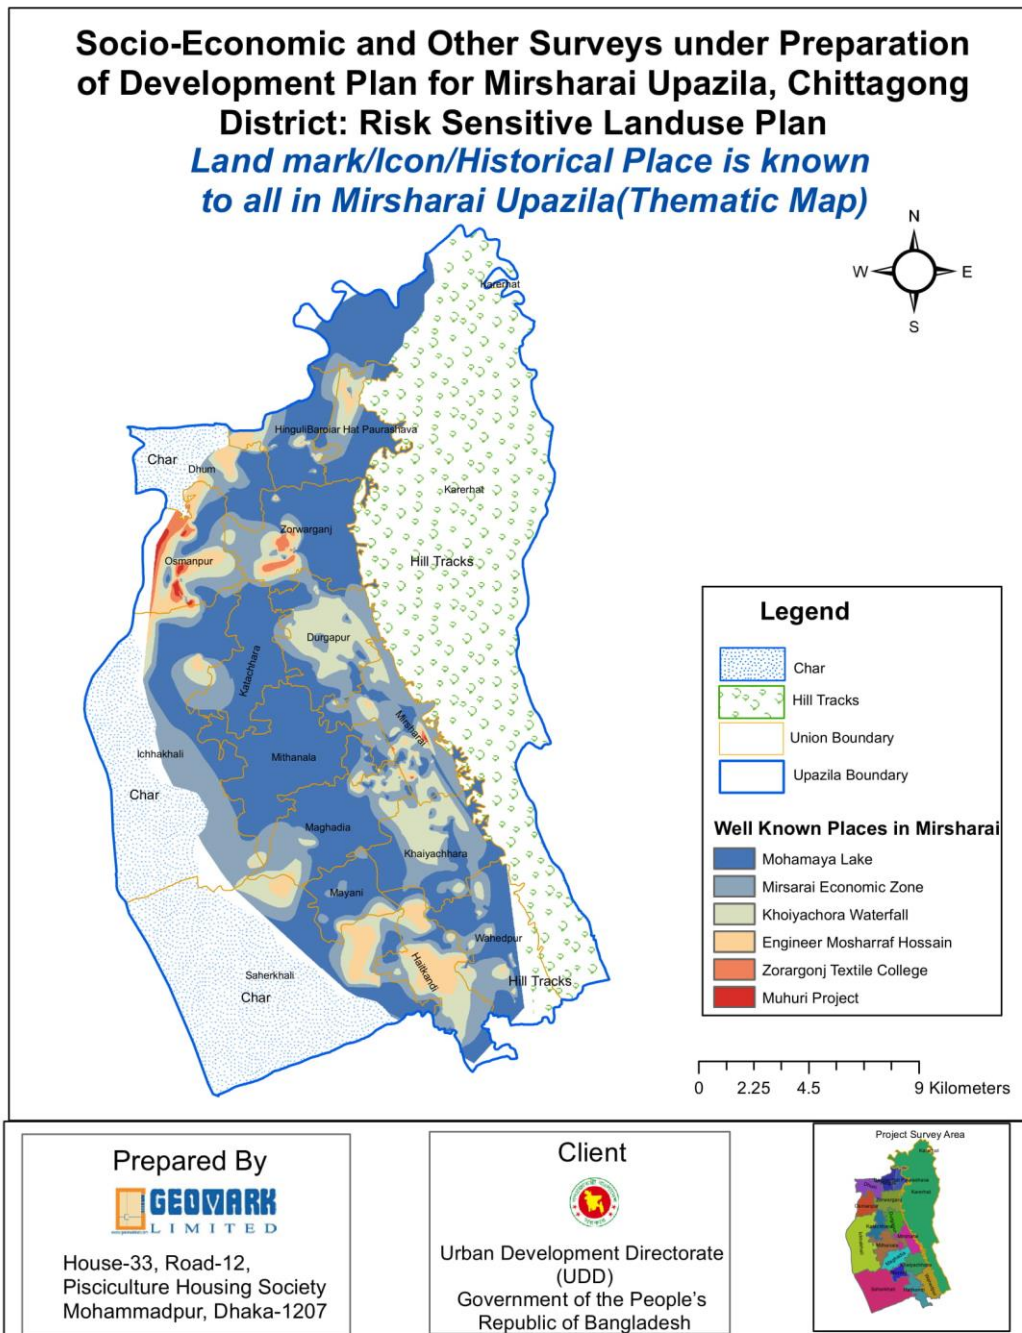

Figure 6: Bar diagram showing the distribution Land mark/icon/historical places

Political leaders also represented the Mirsharai, Engineer Mosharraf Hossain and Dilip Barua are representing Mirsharai, and Engineer Mosharraf Hossainis is a Minister of Housing and Public Works in current government of Bangladesh chosen by 12.42% of the respondents as well consider that he is representing Mirshari very well.

*Map 23: Well Known Place*

**Source: Geomark GIS Lab**

**4.14.3 Socioeconomic development for development of Mahamaya and Khoiachara**

**Tourism Spot:** Tourism is an important factor for development of an area. Natural beauties like Mahamaya and Khoiachora are the two important tourist spot in Mirsharai,

*Table 42: Distribution of Socioeconomic development of Tourism Spot*

Categories	Frequency	Percent	Valid Percent	Cumulative Percent
Yes	1029	93.3	93.3	93.3
No	74	6.7	6.7	100.0
<b>Total</b>	1103	100.0	100.0	

Source: Field Survey 2018

93.3% of the respondent to think that it is important to develop the two tourist spot considering the development of socioeconomic development in the area.

*Figure 7: Bar Diagram Showing the distribution*

**4.14.4: Mirsharai upazila in single ward:** Among all the response 52% belongs to the Mirsharai as an Educational town because of some nameable educational institutions like Zorargonj Textile College, Mirsarai Degree College, Baraiyarhat Degree College et cetera. 26.7% respondents express that Mirsharai is a town of unemployment due to high rate of unemployment. Political personnel like Engineer Mosharraf Hossain and Dilip Borua are prominent political person in Mirsharai, so that 3.4% respondents express Mirsharai .

*Table 43: Distribution of Mirsharai in Single Word*

<b>Mirsharai upazila in single word</b>

## Final Report on

*Socio-Economic and Other Surveys under Preparation of Development Plan for Mirsharai Upazila, Chittagong District: Risk Sensitive Landuse Plan*

**1.2: Statistics of the Educational Institution:** In the Table 1.2, statistics of some of important information's are shown. Total 122 educational institutions are considered in this study. Maximum area of instruction is 200(decimal) and minimum area is 3 (decimal), average land area is 39.64(decimal). Maximum number of students recorded is 3008, minimum is 20, and average number students in this survey is 348.99~349 per institution.

*Table 45: Statistics of the Educational Institution*

Statistic	Area (Decimal)	Number of Student	Number of Teacher	Hostel Facilities	Transport Facilities	Number of Dropout Student (primary)	Number of Dropout Student (Secondary)	Number of Dropout Student (Madrasha)
Valid	122	122	122	118	117	43	28	44
Missing	0	0	0	4	5	79	94	78
Mean	39.64	348.99	10.06	.79	.79	.88	2.64	1.86
Range	197	2988	35	1	1	7	30	30
Minimum	3	20	1	0	0	0	0	0
Maximum	200	3008	36	1	1	7	30	30

Source: Field Survey 2018

Average number of teachers in each institution is 10.06~10, where maximum number of teachers is 36 and minimum number teacher recorded is just 1.

**1.3: Information of Educational Institution:** In the Table 1.3, shows the maximum 37.7% are Madrasha having 46 in the count. 35.2% information of primary school and 22.1% about high school.

*Table 46: Distribution of Educational Institution*

Educational Institution	Frequency	Percent	Valid Percent	Cumulative Percent
Kindergarten	2	1.6	1.6	1.6
Primary School	43	35.2	35.2	36.9
High School	27	22.1	22.1	59.0

## Health Facilities

In the health survey, we have observed 20 healthcare centres in the survey area, among them we were trying to include all types' healthcare centres. In this survey, we have included government health care as well private clinic, homio hall, Diagnostic centre, Dental Clinic et cetera.

### 1.1 Health Centre:

*Table 61: Name and Location of the health centre*

<b>Name of Health Facilities Centre</b>	<b>Location</b>
Modern Homio & Clinic	Mannan Bhobon, Baraiyarhat
Bismillah Dental Care	Mannan Bhobon, Baraiyarhat
Bijoy Community Eye Hospital	Al-Fatah City Center, Zorargonj
Baraiyarhat General Hospital	Old D T Road, Baraiyarhat
Popular Lab. & Diabetic Centre	Haowa Bhobon, Zorargonj
Baraiyarhat Eye Hospital	North Bus Stand, Baraiyarhat
Jononi Clinical Lab.	Jamalpur Super Market, Baraiyarhat
Bijoy Dental Clinic	North Bus Stand, Baraiyarhat
Niharika Homio Hall	Jamalpur Super Market, Baraiyarhat
Medipath Diagnostic Center	Haji Abul Bashar Market, Baraiyarhat
Shefa Insan Hospital & Diagnostic	North Sonapahar, Baraiyarhat
Ebadat Dental Care	Jomidar Plaza, Baraiyarhat
Nur Dental Care	Majeda Building, Baraiyarhat
Jahan Detal Care	Al-Amin Shoping Center, Baraiyarhat
Mediscan Ltd. Diagnostic Center	Al-Amin Shoping Center, Baraiyarhat
Ensure Medilab	Al-Amin Shoping Center, Baraiyarhat

Baraiyarhat Physiotherapy & Dental Care	Abu Usama Super Market, Baraiyarhat
Dr. Salauddin Dental Care	Abu Usama Super Market, Baraiyarhat
Rajonigondha Diagnostic Center	Baraiyarhat
Baraiyarhat Municipality Health & Family Care Center	Jamalpur

## Industry Survey

**1.1 Basic Information:** Some important industry name and location in the survey area, which are surveyed in details for the other survey study.

*Table 68: Name of industry and Location*

Name of the Industry	Location
M.E.A.S Bricks field	Purbo Hinguli, Mirsorai
Baro Awlia Bread Factory	Vogobotipur, Mirsorai
Eco Block Fa	Dhoom Ghat, Mirsorai
Cotton Factory	Chairman Road,
C.P Bangladesh company ltd.	Sadarmadighi, Mirsorai
Precast Pipe Factory	Gortakia, Mirsorai
Abu Taher Sawmill	Korerhat, Mirsorai
Amir Hosen Sowmill	Shantirhat, Mirsorai
Chowdhari Bricks Field	Purbo Raypur, Mirsorai
S. B. K Bricks Field	Korerhat, Mirsorai
Kaium Sowmill	Shantirhat, Mirsorai
Hazi Abu Taher Sowmill	Shantirhat, Mirsorai
Janota Sowmill	Shantirhat, Mirsorai
Rahim Sowmill	Baroiyarhat, Mirsorai
Ruhul Ameen Sowmill	Shantirhat, Mirsorai
Hazi Delower Oil Mill	Shantirhat, Mirsorai
Nadia Sowmill	Shantirhat, Mirsorai

### 1.2 Industry Type (Formal/Informal):

*Table 69: Industry Type (Formal/Informal)*

Categories	Frequency	Percent	Valid Percent	Cumulative Percent
<b>Formal</b>	5	29.4	29.4	29.4
<b>Informal</b>	12	70.6	70.6	100.0
<b>Total</b>	17	100.0	100.0	

Source: Field Survey 2018

In the table 1.2, total number of formal industries are 29.4% and, 70.6% are informal industry in the survey area.

**1.3 Distribution of Finance:**

*Table 70: Distribution of Finance*

<b>Classes</b>	<b>Frequency</b>	<b>Percent</b>	<b>Valid Percent</b>	<b>Cumulative Percent</b>
<b>Self</b>	13	76.5	76.5	76.5
<b>Loan</b>	1	5.9	5.9	82.4
<b>Joint venture</b>	3	17.6	17.6	100.0
<b>Total</b>	17	100.0	100.0	

Source: Field Survey 2018

In the Table 1.3, there is 76% of industries are financed by the owner of the industry, 17.6% industry run by a joint venture.

**1.4. Input (Raw Materials):** Different types of raw materials needed for the different types industry. In the survey area, we have found that some different types of industries.

*Table 71: Input items of different industries*

<b>Industry Type</b>	<b>Input Items</b>	<b>Sources</b>
Brick Field	Soil	Local Area
	Coal	Sylhet, India
	Diesel	Diesel
Saw Mill	Wood	Local/Forest Area
Pipe Factory	Stone	Sylhet
	Rod	BSRM Steel Factory
	Sand	Dhumghat
Bread Factory	Flour	Mirsharai
	Sugar	Zorargonj
	Oil	Zorargonj

## Bank, Insurance and Shop Survey

**1.1 Some Formal Structure in the Survey Area:** A formal organization is a fixed set of rules of intra-organization procedures and structures. As such, it is usually set out in writing, with a language of rules that ostensibly leave little discretion for interpretation.

**1.2 Total number of labours in the formal sector in the survey area:** The majority of the formal structure are Bank, which having maximum number of labourers.

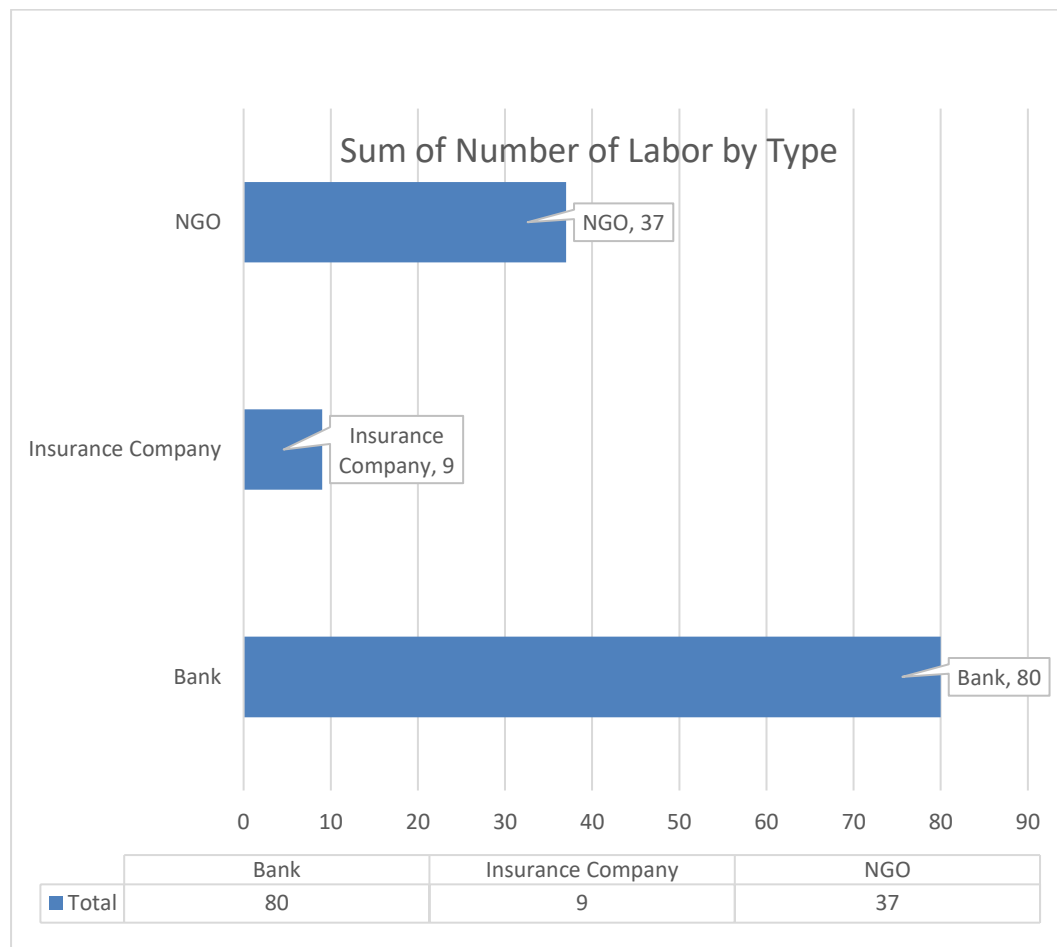

Figure 9: Total number of labour in the formal sector in the survey area

### 1.3 Informal Structures

*Table 72: Informal Structures in the survey area*

<b>Name</b>	<b>Structure Type</b>	<b>Type</b>
Vat Ghor	Tin Shed	Restaurant
Mayer Doa Hotel & Restaurant	Semi Pucca	Restaurant
Kashbon Hotel & Restaurant	Pucca	Restaurant
Madina Jewellers	Pucca	Jewellery

## **CHAPTER 5**

### **5. Planning implication of collected data**

#### **5.1 Local savings and potentiality:**

Investment is the key driver for any type of development. Investments generally comes from Entrepreneurs, Government investment, foreign aid etc. but local investment like, micro investment from higher middle- or middle-income group can also contribute to the overall development. People do savings for the future so that they can invest the money to achieve economic solvency and security in days to come. So, today's savings can be a potential source of investment in future. During the survey, we didn't take direct response from the people whether they are willing to invest but we took response about their income, expenditure in different sectors, saving status etc. Using that knowledge, we analysed the savings pattern from spatial perspective. We produced a map with 3 (Low, moderate, high) types of potentially based on savings intensity. This map is not based on actual willingness to invest but based on local people's savings pattern from which we can draw a clear understanding about the economic strength and potentiality. In Mirsharai upazila, highly potential areas are concentrated within the proximity of urban areas.

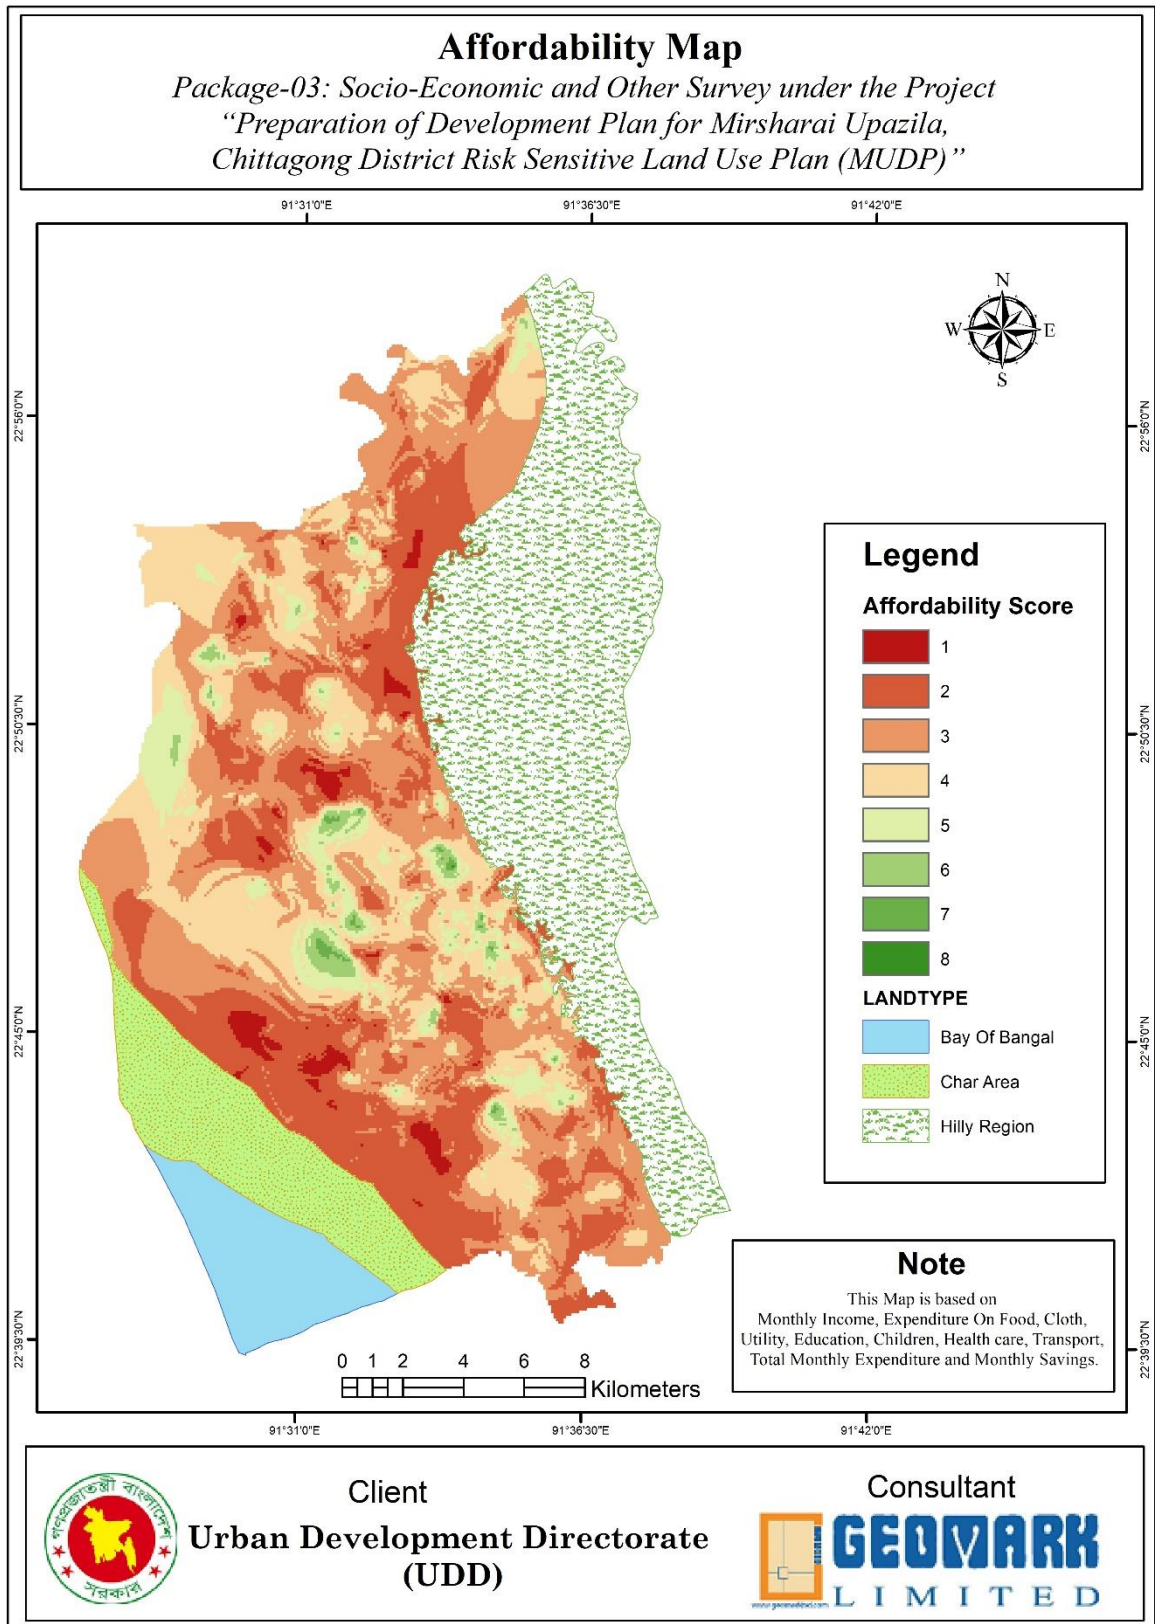

*Map 24: Local Investment potentiality map*

**5.2 Affordability assessment:**

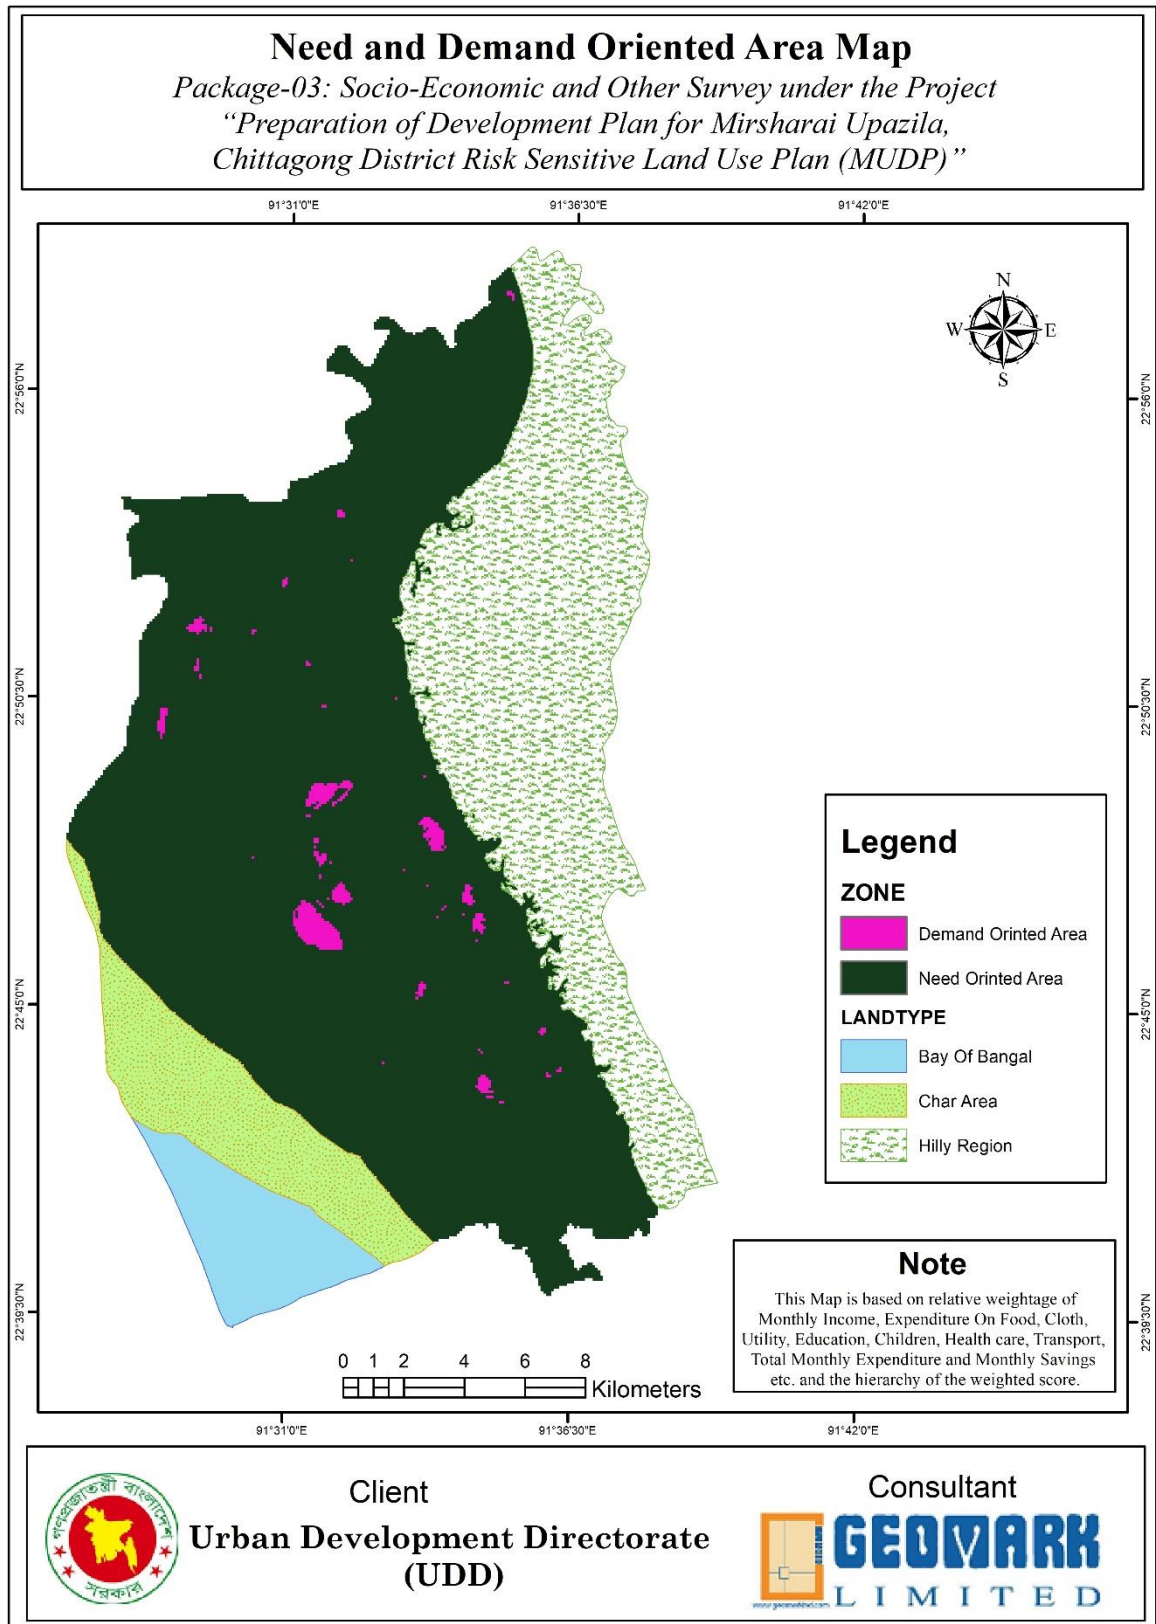

We have prepared a GIS based Spatial Model to calculate people's affordability on spatial perspective. We prepared several raster maps for Monthly Income, Expenditure on Food, Cloth, Utility, Education, Children, and Health care, Transport, Total Monthly Expenditure and Monthly Savings. All these raster maps were used in the model as variable maps. We assigned relative weightage for each variable raster according to their relative influence and impact on affordability. The model output map represents the relative affordability for different land parcels of the project area. The higher the affordability score, the better the affordability of the people living on that particular region. In Mirsharai Upazila, most of the areas are indicated as less affordability oriented.

Map 25: Affordability Map

### **5.3 Need and Demand Oriented Area:**

In general sense, need usually refers to the fundamental necessities essential for our survival or at least to maintain a minimum standard of living. But if our affordability goes high, we can dream for more and that creates demand. In countries like Bangladesh, it is very unlikely to find a lot of people having the fancy opportunity of demand, rather than struggling just to fulfil the marginal daily survival amenities they need. To map the Need and Demand oriented areas in the project area we formed another model. As extreme high-income group with huge level of affordability is pretty rare and even certain level of rich people having the ability to afford demand are not too available, we can categorize 6, 7, 8 scored areas as demand-oriented areas and 1 to 5 as Need oriented areas. In Mirsharai Upazila, only a small portion of the areas were found as demand-oriented area.

*Map 26: Need and Demand Oriented Area Map*

## **CHAPTER 6**

### **Conclusion**

In the survey, we have found out some socioeconomic factors which are directly related to the socioeconomic status of the survey are.

In the Mirsharai Upazilla, we have found out the 53.3% of the male respondent and 44.7% of the female respondents. In the report, we find out the 23.3% residents are illiterate and 6% of total residents are highly educated.

Because of most of the female respondent responses about their occupations as housewife, so that in the report maximum percentages (39.5%) of occupation is a housewife. Maximum number of family type in the survey is single type, which contains 72.2% of the total percentages, and family members at the age range 05-09 contains maximum 53.2% in the count.

Religion distribution in mainly Muslim 85%, Hindu 13.8% and Buddhist has 1.2% in the survey area. We find out 37 autism cases in the survey area, where maximum 33 cases having Autistic Disorder/Classic Autism, and other autism types are Asperger Syndrome and Pervasive Developmental Disorder.

In the report, 36% of the resident have earned less than TK5, 000 per month in the survey area, and only 2.8% have earned more than TK50000 per month in the survey area. 40.2% of the resident staying outside the country temporarily among total residents who have been staying outside the survey area.

Drinkable water is available here, 88.8% water is drinkable, and 93.0% water sources have arsenic contamination. Khaiyachora and Mohamaya Lake are two most favourite travel destination across the country situated in this area.

In the education survey student dropout is not in big numbers, but transport and hostel facilities are not impressive in this area. Municipalities are trying to collect and dispose waste properly. Some of the area like hill tracts and lakes have standard noise level (70dB), but others area is not.
